EXAMINER'S AMENDMENT/REASONS FOR ALLOWANCE

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Andrew Stover on 28 February 2006.

The application has been amended as follows:

Claim 29, line 19: after "body panels", —wherein said first and second corresponding adhesive properties of said first and second adhesive regions comprise first and second adhesive basis weights respectively, wherein said second adhesive basis weight is greater than said first adhesive basis weight— has been inserted.

Claim 1 is cancelled.

The following is an examiner's statement of reasons for allowance: The closest prior art uncovered during examination discloses the following elements:

US 6,132,410 issued to Van Gompel et al: teaches an absorbent insert connected respectively to front and rear body panels with first and second adhesive regions, but does not teach the adhesive regions having first and second corresponding adhesive properties respectively wherein the adhesive properties have different values or basis weights.

Art Unit: 3761

US 4,437,860 issued to Sigl et al: teaches first and second adhesive regions obtained by utilizing an adhesive in first and second concentrations to provide different adhesive properties but does not teach first and second adhesive regions obtained by using first and second adhesives having first and second corresponding adhesive properties and first and second corresponding basis weights and does not teach an absorbent insert connected to front and rear body panels.

WO 99/32062 issued to Kerr et al: teaches a sanitary napkin having first and second adhesive regions having first and second basis weights but does not teach an absorbent insert connected to front and rear body panels.

While the prior art of record discloses various elements of absorbent inserts, body panels and adhesives, none disclose or fairly suggest an absorbent garment comprising a diaper including front and rear body panels and an absorbent insert having first and second end portions connected to the front and rear body panels in combination with one of the first and second end portions of the insert connected to one of the front and rear body panels with first and second adhesive regions wherein the first and second adhesive regions have corresponding first and second adhesive properties respectively and the first and second adhesive properties have different values and different basis weight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
